

PosturePremier

At the heart of a Sealy PosturePremier mattress is the Sealy PostureTech® Coil. This revolutionary patented design incorporates a host of technologies to provide superior comfort, support and the correct spinal alignment when you sleep.

The coil's Sensory Arm™ actually detects the shape, weight and movement of your body while you sleep, then adjusts itself to provide correct spinal alignment. This means you get better quality sleep. And when you sleep better, you wake up feeling more refreshed.

1. Triple Offset Design

Revolutionary design provides superior body conformance, while preventing roll together.

2. Heat Tempered Steel

High carbon Titanium alloy coils are heat tempered to ensure maximum durability of the entire spring unit.

3. Sensory Arm™

Detects the shape, weight and movement of your body while you sleep, then adjusts itself to provide correct spinal alignment.

Comfort System

Sealy PosturePremier's new combination of comfort materials featuring natural cotton, premium Sealy foams and fibres ensures you'll receive the correct comfort and feel for your body over many years.

Patented EdgeGuard

A firm polyethylene insert provides an average of 10% more sleep space and a firm "sitting" edge.
