

PALATIAL CREST™

THE ULTIMATE IN SUPPORT

The Journey Behind The Dream

A bed that combines science with superior materials and outstanding aesthetics.

Exquisitely designed to be an aesthetic masterpiece, the Sealy Posturepedic® Palatial Crest™ range boasts contemporary details and a refined style that are the epitome of luxury.

Sealy Posturepedic® Palatial Crest™ features the latest spring technology - RestSUPPORT™ Coil - designed to cradle every part of the body and provide deep down support. Some of our Palatial Crest™ models are made with exotic materials such as cashmere, alpaca, silk and wool blended fibres, to help enhance your luxurious sleeping experience.

Think Of It As A Sleep Spa

In the same way your body responds to a soothing health spa, Sealy Posturepedic® Palatial Crest™ is designed to assist your body to completely relax and recover like no other bed. A good night's sleep is essential to a healthy body and optimal performance. By using the finest materials, Posturepedic® Palatial Crest™ helps you to escape to the luxury of deep sleep every night.

RestSUPPORT™ Coil

Sealy's most advanced coil technology uniquely provides three stages of support:

1st Stage

2nd Stage

3rd Stage

1st Stage:

The unique SynerFlex surface micro-conforms to relieve pressure points.

2nd Stage:

The upgraded Align Head design is softer at first and more supportive deep down to provide better contouring and Posturepedic® support.

3rd Stage:

The Posturepedic® innercore is designed to sense the load applied and provide the orthopaedically correct response.

Made with Titanium alloy for extra strength and long-lasting performance.

Design Is More Than Looks Alone

Sealy Posturepedic® Palatial Crest™ represents the harmony of stunning aesthetics paired with outstanding performance. Considered design has resulted in a sleep set that is both innovative and superbly functional, as well as a beautiful decorative piece for your bedroom.

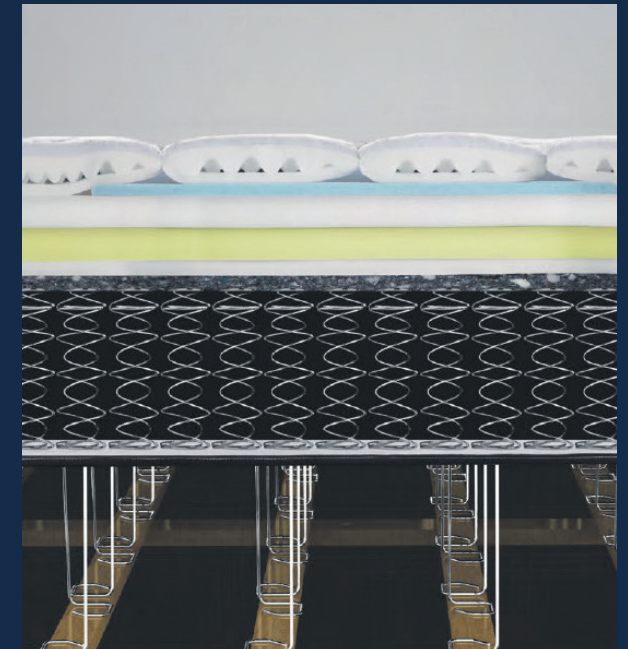

ComfortCore® Plus

At the centre third of the mattress, every model in the Palatial Crest™ collection features a layer of gel-infused visco elastic, which provides a superior level of conformance and alignment to the lower back, where you need it most.

An Exquisite™ Sleep System

Luxurious comfort materials provide an initial conforming feel. The ComfortCore® Plus smoothly transitions into the RestSUPPORT™ system to promote better conformance. The sleep system is completed by the PermaGrid foundation with Titanium alloy modules for strength and durability.

Ice-Touch®

The Ice-Touch® Technology does not simply cool you down, it is cool-to-touch and provides an instant cooling effect on your skin. You will fall asleep more quickly, enjoying a qualitative night's sleep.

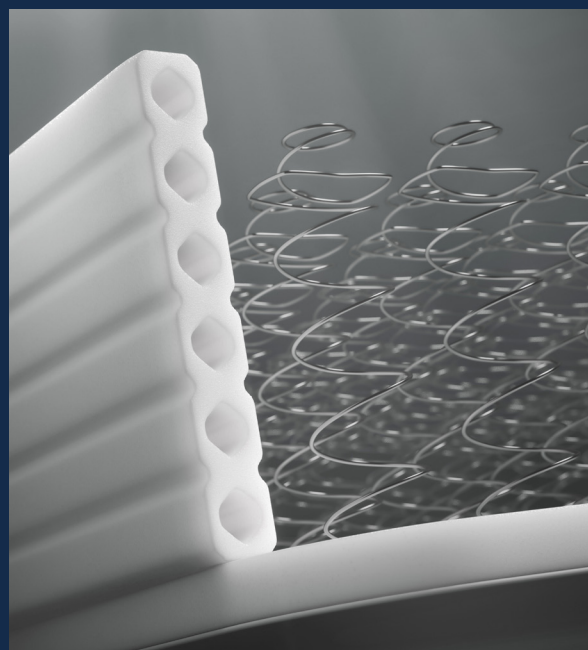

PermaGrid® Foundation

Made with Titanium alloy, steel modules disperse the shocks and stresses placed on the mattress to ensure long-lasting performance and an extended comfort life.

UniCased® XT Edge Support

Sealy's most innovative edge support system, encases and locks into the spring system for exceptional edge-to-edge stability, designed to provide undisturbed sleep.

SmarTex® Fabrics

A smart textile fabric treatment that responds only when it's needed to disperse heat and moisture so you can sleep more comfortably.

Exotic Materials & Embroidery

10 - Year Guarantee

When you purchase a Sealy Posturepedic®, you are choosing a trusted bedding brand. Each component is of the highest quality so you can enjoy your mattress for many years to come.

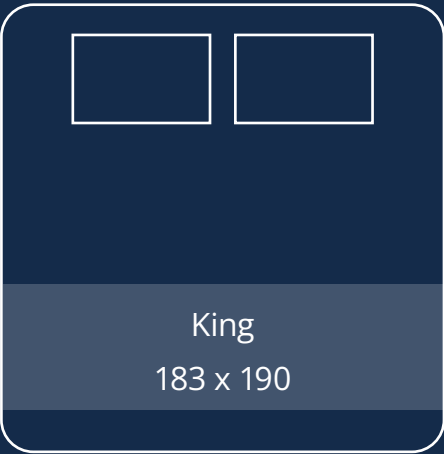

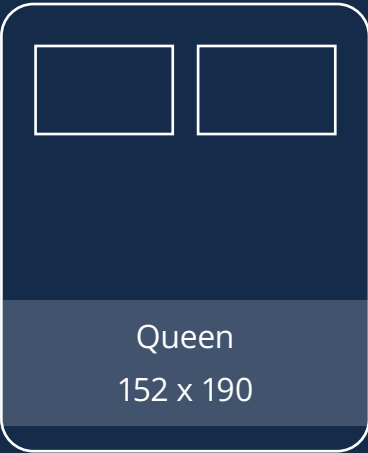

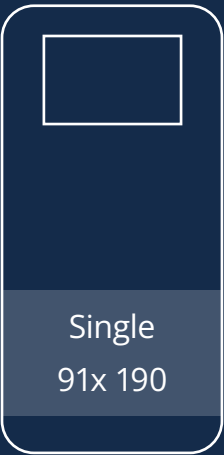

Name Embroidery Service

Just as your Sealy Posturepedic® Palatial Crest™ mattress is designed to meet demanding standards, every detail is meticulously attended to with you in mind. This is why we are offering a unique service of having your name exquisitely embroidered on your very own Sealy Posturepedic® Palatial Crest™ mattress. Now you have a bed to call your very own.

Exotic Materials Found In Some Of Our Palatial Crest™ Models

- | | |
|----------------|---|
| Cashmere Fibre | - Cashmere fibre is prized for its softness and great thermal properties. It keeps your body warm in winter and cool in summer. |
| Alpaca Fibre | - Alpaca is a strong and resilient fibre that has more thermal capacity and is more luxurious than almost any other animal fibre. |
| Silk Fibre | - Silk fibre is prized for its lustrous sheen and luxurious touch. It is highly resilient and durable. |
| Wool Fibre | - A natural fibre which is inherently springy and soft. Wool will keep you warmer in winter and cooler in summer. |
